Research Interests

Reliable and clinically grounded medical AI for real-world clinical deployment: interpretable evaluation of medical generative models, uncertainty quantification for safe decision-making, and cross-modal learning to extend access to advanced imaging.

Education

New York University, New York, United States *2024-Present*
PhD, Center for Data Science CGPA: **3.98/4.0**

- Advisors: Prof. Eric Oermann and Prof. Kyunghyun Cho.
- Affiliations: CDS, CILVR, ML2.
- **NYU Center for Data Science Fellowship, NYU Center for Data Science Medical Fellowship**.

KAIST, Republic of Korea *2020-2022*
Masters, Graduate School of AI CGPA: **4.05/4.3**

- **Outstanding Performance**
- Thesis Topic: Task agnostic and post-hoc unseen distribution detection.
- Advisor: Prof. Edward Choi.
- KAIST International Students Scholarship

Panjab University, Chandigarh, India *2015-2019*
Bachelor of Engineering With Honours, Information Technology **CGPA: 9.24/10**

- **Third position** in the department.

Research Experience

Google DeepMind / Google Research *Predoctoral Researcher* *Sept 2022 - Aug 2024*

- Mentors: Dr. Gaurav Aggarwal, Alok Talekar, Ishan Deshpande, Dr. Sujoy Paul
- Agricultural Landscape Understanding (ALU)
  - Led the **ALU Project**, which aims to segment agriculture-related feature types by utilizing satellite imagery.
  - Enhanced data handling by addressing **class imbalance**, **scarcity of unlabeled data**, and **domain generalization** challenges due to geographic and temporal distribution shifts.
  - The project was presented in KDD 2026, and in AGU 2023 as an oral presentation, Google Research Conference 2023, Google I/O 2023 [demo], Google I/O Connect India 2023 [video], Google For India 2022 [video, G4I blog, google blog 2023, google blog 2024, google blog 2025].
  - **Launched in 11 countries** in global south via API https://agri.withgoogle.com/
- One Shot Segmentation
  - Developed an innovative segmentation technique capable of **learning effectively from a single labeled instance**.
  - Objective is to **circumvent the conventional model training process** for segmentation tasks, which typically requires the annotation of extensive datasets.
  - Performance **comparable to Visual Prompting methods** that are trained on tasks relevant for segmentation.

New York University *PhD Researcher* *Aug 2024 - Present*

- Mentors: Prof. Eric Oermann, Prof. Kyunghyun Cho
- Clinically-Grounded Report Evaluation (ICARE)
  - Developed **ICARE**, an interpretable and clinically-grounded agent-based evaluation framework for radiology report generation, aligning with **expert radiologist judgment** better than prior metrics and advancing safe deployment of report generation models.
  - Accepted to NeurIPS 2025 GenAI4Health and WiML Workshops.
  - Built an interactive ICARE demo on **NVIDIA DGX Spark early-access GPUs** for real-time evaluation of medical text generation systems [Nvidia News] .

- Deployed at NYU Langone Health and is running on diverse patient population.
- Cross-Modal Diagnostic Modeling (Thoracle)
  - Leading **paired CXR–CT representation learning** to enhance diagnostic reasoning by supervising models across complementary imaging modalities.
- Monotonic Uncertainty Regularization (MUR)
  - Investigating **monotonic uncertainty principles** to ensure confidence improves with information, advancing reliability in medical AI systems.

EdLab, KAIST *Student Researcher* *Aug 2020 - Aug 2022*

- Mentor: Prof. Edward Choi
- Reliability of Deep Neural Networks
  - Developed a simple yet effective, task-agnostic and post-hoc unseen distribution detection method, which was accepted at **WACV 2023** and the **ARROW workshop in ECCV 2022**.
  - Designed a novel task for detecting attribute-based shifts, developed a dedicated dataset, and formulated an innovative approach, **currently under review at an A* conference**.
- ML for Healthcare
  - Investigated Federated Learning's practical applications in healthcare, which was accepted at **CHIL 2023**.
  - Proposed a method for detecting noisy ECG signals, enhancing precision in cardiology, presented at **ICPR 2022**.

Brown University *Summer Intern* *July 2020 - Sept 2020*

- Mentors: Prof. Srinath Sridhar (Brown Univ) and Prof. Leonidas Guibas (Stanford Univ).
- Canonicalization of 3D Pose
  - Conducted research on self-supervised canonicalization of 3D pose for full and partial shapes.
  - Paper accepted for a poster presentation to **CVPR 2022**.

Indian Institute of Technology Hyderabad, India *Visiting Researcher* *Jan 2019 - June 2020*

- Mentor: Prof. Vineeth N Balasubramanian
- ViQAR: Visual Question Answering and Reasoning
  - Conducted research in Vision and Language applications and introduced a new task, ViQAR: Visual Question Answering and Reasoning, which focuses on automatic generation of the answer, and of a rationale, given a visual query.
  - Paper accepted for a poster presentation to **MULA workshop, CVPR 2021**.

Celestini Project India *Research Intern* *June 2018 - Aug 2018*

- **Mentors:** Dr. Aakanksha Chowdhery (Google Brain and Tensorflow) and Prof. Brejesh Lall (IIT Delhi).
- Real-time Air Pollution Forecasting
  - Developed a temporal forecasting solution based on the historical data reported by Central Pollution Control board to predict the real-time and fine-grained air quality information in five locations of Delhi.
  - Blog post, Indian press and Demo youtube video.
  - Paper accepted for a poster presentation to **GlobalSIP 2019**.

Honors, Fellowships, and Awards

- **NYU Data Science Graduate Fellowship**, 2024–2029.
- **NYU Center for Data Science Medical Fellowship**, 2024–Present.
- **Travel Award, NeurIPS (Women in Machine Learning)**, 2025.
- **KAIST International Students Scholarship**, 2020–2022.
- **Grace Hopper Celebration India (GHCI) Student Scholarship**, 2018.
- **Celestini Project India (Marconi Society and Google)**, Second Prize, 2018.
- **Economic Times Campus Stars**, recognizing India's brightest engineering students, 2018–2019.
- **Hackathons:** Second Prize, Hack In The North 2017; Second Prize, Hack Infinity 2017; Sixth Prize, IndiaHacks 2017 by HackerEarth.

- Ishan Deshpande, Bhartendu Pandey, **Radhika Dua**, Amandeep Kaur, Alok Talekar, Anu Ramaswami. **AgroForestry in India - Towards Country Wide Finescale Carbon Accounting**, ***American Geophysical Union, AGU 2023***. [**Poster presentation**] [abstract]
- Karan Choudhary, Chintapalli Srirama Srirama Murthy, Sunil Kumar Dubey, **Radhika Dua**, Dinesh Tewari, Alok Talekar. **Crop analytics at field parcel level using multi-resolution satellite images, segmentation and mapping techniques: Towards a transformative solution for crop surveys**, ***American Geophysical Union, AGU 2023***. [**Poster presentation**] [abstract]
- Chintapalli Srirama Srirama Murthy, Sunil Kumar Dubey, Karan Choudhary, **Radhika Dua**, Ishan Deshpande, Alok Talekar. **Mapping tree cover over farm parcels and assessing the scope for agro-forestry development using high resolution satellite images and segmentation techniques**, ***American Geophysical Union, AGU 2023***. [**Poster presentation**] [abstract]

Preprints

- **Radhika Dua***, Jeonghoon Park*, Jimin Hong*, Daehoon Gwak, Yixuan Li, Jaegul Choo, Edward Choi. **Natural Attribute-based Shift Detection**, ***Arxiv 2021***. [paper]

Teaching Experience

- **Fundamentals of Machine Learning**, Section Leader and Grader, New York University, Fall 2026. Course instructor: Prof. Kyunghyun Cho.
- **Responsible Data Science (UA 202)**, Teaching Assistant, New York University, Spring 2025. Course instructor: Prof. Umang Bhatt.
- **Scientific Writing (CC500)** and **Graduate English Presentations (HSS583)**, Teaching Assistant, KAIST. Course instructor: Prof. Mik Fanguy.
- **Deep Learning for Computer Vision**, Teaching Assistant, NPTEL. Course instructor: Prof. Vineeth N. Balasubramanian.
- **Deep Learning for Computer Vision (CS5370)**, Teaching Assistant, IIT Hyderabad. Course instructor: Prof. Vineeth N. Balasubramanian.
- **Advanced Topics in Machine Learning (CS6360)**, Teaching Assistant, IIT Hyderabad. Course instructor: Prof. Vineeth N. Balasubramanian.

Talks and Presentations

- **Research Talks and Presentations**
  - *More Information, Less Uncertainty? Monotonic Uncertainty Regularization Under Progressive Information*
    - Samsung Research (Internal Research Talk), June 2026
  - *Clinically Grounded Agent-based Report Evaluation: An Interpretable Metric for Radiology Report Generation*
    - Global AI Frontiers Lab (GAIFL) Workshop, South Korea (Lightning Talk), July 2026
    - Global AI Frontiers Lab, Oct. 2025
    - AI Mixers, NYU Langone Health (Lightning Talk), 2025
  - *Agricultural Landscape Understanding at Scale*
    - Google Research Week (Lightning Talk), 2024
    - AGU (Oral Talk), 2023
    - Google Booth, AGU, 2023
  - *Towards Sustainable Agriculture Prioritizing the Global South Using Machine Learning*
    - IISc Open Day (Keynote Talk), 2023
- **Outreach and Student Sessions**
  - **Research Lightning Talk**, **NYU Center for Data Science PhD Admissions Information Session**, Oct. 2026 — presented medical AI research to prospective PhD students.
  - **CodeChef Campus Chapter UIET**, Speaker, 2016–2017 — programming sessions for junior-year students.
  - **Software Freedom Day**, Panjab University, Speaker, 2017 — encouraged junior-year students to contribute to open source and pursue STEM education.

Professional Activities

- **Organizing and Leadership**
  - **NYU CILVR Seminar Series**: Co-organizer (Spring 2025, Fall 2025, Spring 2026).
  - **WiML Workshop at NeurIPS 2026**: Travel-Funding Assistant SuperVolunteer.
- **Peer Reviewing**
  - **Conferences (Reviewer / Subreviewer):** ICLR (2027); CVPR (2022, 2025, 2026); ECCV (2022, 2024, 2026); ICCV (2023); NeurIPS (2025); BMVC (2026); WACV (2026); AAAI (2024); ICVGIP (2024); SDM (2020); ML4Health (2026).
  - **Workshops (Reviewer / Subreviewer):** WiML and GenAI4Health, NeurIPS (2026); WiCV, ECCV (2024).
  - **Scholarship Reviewing:** Grace Hopper Celebration (GHC) Scholarship (2020).
- **Mentoring**
  - Mentor, **Climate Tech Startup Meet 2023** by Google.
  - Poster Mentor, **Women in Machine Learning (WiML) Workshop**, NeurIPS 2020.
  - Mentor, **Hacksprint Version 2 Hackathon**, Panjab University, Chandigarh.
  - Fellow Campus Ambassador, **Campus Geek Ambassador Program by GeeksforGeeks**, 2017–2018.
- **Volunteering**
  - **Women in Machine Learning**, NeurIPS 2025.
  - **Google DeepMind Booth**, ICML 2024.
  - **Google Networking Event** and **Google Booth**, ICCV 2023.
  - Virtual conferences: **ICML 2021**, **ICML 2020**, and **ACL 2020**.
